

To whom it may concern:

Regarding HB 6034, I am in support of this bill. I am on the DEEP Conservation Advisory Council and a resident of Newtown, CT.

Hunting on private property on any day of the week should be allowed.

Bowhunting is an effective means of controlling the deer population in a humane and natural way.

Further, Connecticut lags behind its neighbor states in failing to permit Sunday hunting and therefore foregoes hunting license revenue.

We have such an atrocious deer overpopulation problem that we ought to allow MORE deer hunting, but this bill is a good start and I support it. Please move it forward in the process.

Thank you,

Elana A. Bertram, Esq.
